

CARCASSING TIMBER

We hold an extensive range of carcassing timbers – timbers for structural and framing applications – for both internal and external use.

A wide range of sizes from 47 x 50mm (2" x 2" approx) to 75 x 225mm (3" x 9" approx) up to 4.8m long (16' approx) means most applications can easily be accommodated ex-stock. Larger sections – up to 300 x 300mm (12" x 12" approx) or longer lengths – up to 7.2m (approx 24') are available to order with the minimum of delay.

The majority of the items we hold are stress graded to a minimum of C16 rated (equivalent to the old GS or SC3 ratings) with C24 rated items available to order (equivalent to the old SS or SC4 ratings).

Our C16 graded stock is machined to a regularised finish with 4 rounded corners, giving consistent high quality material for a superior result.

We hold an extensive range of treated items, for external applications, from sawn roofing laths for slate and tile, fencing materials for post and rail, palisade and featheredge fencing, structural C16 graded items – for decking sub-frames etc – all in Tanalith pressure treated softwood to ensure a long service life.

In addition we also keep Railway Sleepers – both new and reclaimed for a wide range of garden projects in decorative or structural applications.

Please feel free to contact us with your requirements, and we will be pleased to advise on the best price and earliest availability.
