

SMALL MOULDINGS

Small timber mouldings are ideal to create the finishing touch to any project, large or small. Produced in both top quality softwood and hardwood, they can be used to finish off, create effects, or simply add a decorative feature to an otherwise plain item.

All our mouldings are from the UK's leading supplier of decorative timber mouldings, Richard Burbidge, and are predominantly FSC or PEFC certified.

We keep a wide range of mouldings – quadrants, dowels, scotias, corner beads, panel moulds, glass beads, ovovlos, doorstop, fluted beads – the list is extensive. In addition to this, we have a wide range of PSE sections, from sizes as small as 4mm thick!

Most sections are provided in handy 2.4m lengths – just under 8 feet long – so are both portable and easy to manage.

Whatever you require, we're likely to have a moulding to suit, and if not, we can offer any moulding from the huge range of over 300 mouldings that Richard Burbidge supplies – just ask us for further details.
